

# Mobile Breast Cancer Screening

## MOBILE DIGITAL MAMMOGRAMS THROUGHOUT CALIFORNIA

We provide mobile digital screening mammography to employer groups, health fairs, medical facilities and organizations. With options for portable units or our full-service, self contained coach, Alinea can accommodate every type of health event.

### How It Works

#### CHOOSE YOUR OPTION

##### Indoor or Outdoor?

*Book an event with us and let us know your preference of indoor or outdoor set-up.*

#### WHO IS COVERED?

##### Asymptomatic women ages 40+

*Mammography is typically covered for asymptomatic women over 40 by most insurance plans including Medi-Cal and Every Women Counts. Some PPOs may cover a baseline at 35. Ask us for our accepted insurance list.*

#### APPOINTMENTS

##### It only takes 15 minutes per screening

*We highly suggest the patients pre-register with consecutive appointment times for seamless service, however walk-ins are also welcome. Our accounts team can provide details on how to get patients to sign up.*

#### SET-UP

##### 45-60 min prior to the screening time

*On the day of the event, Alinea will set up our equipment and other materials based on the needs of the event.*

#### HOW MANY WOMEN IN A DAY?

##### We can screen 4-5 patients every hour

*We require a minimum of 30 women to commit to an event and can see upwards of 45.*

### ABOUT ALINEA

**20,000+**  
women screened annually
